Recovering your system

Using recovery options on your Notebook PC allows you to restore the system to its original state or simply refresh its settings to help improve performance.

IMPORTANT!

.

Backup all your data files before doing any recovery option on your Notebook PC.

- Note down important customized settings such as network settings, user names, and passwords to avoid data loss.

- Ensure that your Notebook PC is plugged in to a power source before resetting your system.

Windows® 10 allows you to do any of the following recovery options:

- ---

Keep my files - This option allows you refresh your Notebook PC without affecting personal files (photos, music, videos, documents).

Using this option, you can restore your Notebook PC to its default settings and delete other installed apps.

- Remove everything - This option resets your Notebook PC to its factory settings. You must backup your data before doing this option.
