Useful tips for your Notebook PC

To help you maximize the use of your Notebook PC, maintain its system performance, and ensure all your data are kept secured, here are some useful tips that you can follow:

- .

Update Windows® periodically to ensure that your applications have the latest security settings.

.

Use an anti-virus software to protect your data and keep this updated too.

.

Unless absolutely necessary, refrain from using force shutdown to turn off your Notebook PC.

.

Always backup your data and make it a point to create a backup data in an external storage drive.

.

Refrain from using the Notebook PC at extremely high temperatures. If you are not going to use your Notebook PC for a long period of time (at least a month), we recommend that you take out the battery if the battery is removable.

.

Disconnect all external devices and ensure you have the following items prior to resetting your Notebook PC:

-

Product key for your operating systems and other installed applications

-

Backup data

-

Log in ID and password

-

Internet connection information
