Configuring the screen resolution settings

Windows

7

To configure the screen resolution settings on Windows, follow the following to open the Screen Resolution setting screen:

1. Click on the Settings app.

2. Click on the Start button anywhere on your Windows desktop. When the pop-up menu appears, click on the Settings icon > Display > Change display settings.

Select the display mode from the Multiple displays: drop-down list.

Duplicate these displays: Select this option to use the additional monitor as a duplicate of your main display.

Extend these displays: Select this option to use the additional monitor as an extension display. This increases your desktop space.

Desktop only on 1 / 2: Select this option to show desktop only on monitor 1 or

remove this display: Select this options to remove the selected display.

Click Cancel or OK. Click Keep Changes on the confirmation message.

Configuring the Internet connection settings

Network connection

S

Configuring a dynamic IP/PPPoE network connection

Configure a dynamic IP/PPPoE network

connection:

Go to Start > Control Panel > Network

1. Network and Sharing Center.

2. From the Network and Sharing Center screen, click Change Adapter settings.

3. Right-click on your LAN and select Properties.

82 > Control Panel > Appearance and Personalization > Display > Change

7: Chapter 2: Using Windows 7 functions
