IMPORTANT SAFETY INSTRUCTIONS

Use only with type of gas approved for this furnace.

Refer to the furnace rating plate.

Install this furnace only in a location and position as specified in the Location Requirements section of these instructions. ■

Provide adequate combustion and ventilation air to the furnace space as specified in the "Venting Requirements" section of these instructions.

Combustion products must be discharged outdoors. ■

Connect this furnace to an approved vent system only as specified in the "Venting Requirements" section of these instructions. ■

Never test for gas leaks with an open flame. Use a ■

commercially available soap solution made specifically for the detection of leaks to check all

connections, as specified in the "Make Gas Connections" section of these instructions.

Always install furnace to operate within the furnace's intended temperature-rise range with a duct system which has an external static pressure within the allowable range, as specified in the "Complete Installation" section of these instructions. See furnace rating plate.

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list

of substances known to the State of California to cause cancer, birth defects, or other reproductive harm, and

requires businesses to warn of potential exposure to such substances.

WARNING: This product contains a chemical known to the State of California to cause cancer, birth defects, or

other reproductive harm.

This appliance can cause low-level exposure to some of the substances listed, including benzene, formaldehyde, carbon monoxide, toluene, and soot.

ADDITIONAL SAFETY INFORMATION

In the State of Massachusetts, the following installation instructions apply:

Installations and repairs must be performed by a qualified or licensed contractor, plumber, or gasfitter qualified or

licensed by the State of Massachusetts.

If using a ball valve, it shall be a T-handle type.

A flexible gas connector, when used, must not exceed 3 feet.

2

SAVE THESE INSTRUCTIONS

When a furnace is installed so that supply ducts carry air circulated by the furnace to areas outside the space containing the furnace, the return air shall also be handled by duct(s) sealed to the furnace casing and terminating outside the space containing the furnace.

A gas-fired furnace for installation in a residential garage must be installed as specified in the "Location Requirements" section of these instructions.

The furnace is not to be used for temporary heating of buildings or structures under construction.

The furnace shall be installed so the electrical components are protected from water.

Furnaces for indoor installation on combustible

flooring shall not be installed directly on carpeting, tile
or other combustible material other than wood
flooring.
