## Indoor Unit Installation

InstallationManual.book Page 11 Tuesday, January 9, 2007 3:22 PM

1. Pass the pipe through the hole in the wall, and hook the indoor unit on the installation plate at the upper hooks.
2. Swing the indoor unit to right and left to confirm that it is firmly hooked on the installation plate.
- 3.

While pressing the indoor unit onto the wall, hook it at the lower part on the installation plate. Pull the indoor unit toward you to confirm that it is firmly hooked on the installation plate.

- For detaching the indoor unit from the installation plate pull the indoor unit toward you while pushing the bottom up at the specified places.
3. While pressing the indoor unit onto the wall, hook it at the lower part on the installation plate. Pull confirm that it is firmly hooked on the installation plate.

### Drainage

1. Run the drain hose at a downward sloped angle.

### NOTE

- Hole should be made at a slight downward slant on the outdoor side.
- 2.

### Indoor Unit Installation

1. Pass the pipe through the hole in the wall, and hook the indoor unit on the installation plate at the
2. Swing the indoor unit to right and left to confirm that it is firmly hooked on the installation plate.
3. While pressing the indoor unit onto the wall, hook it at the lower part on the installation plate. Pull

Put water in the drain pan and make sure that the water is being drained outside.

3.

When connecting extension drain hose, insulate the connection part of extension drain hose with shield pipe.

**CAUTION**

Install the drain pipe for proper drainage. Improper drainage can result in water dripping inside the room.

This air conditioner has been designed to drain water collected from

condensation which forms on the back of the indoor unit, to the drain pan.

Therefore, do not locate the power cord and other parts at a height above the

drain guide.
