INSTALLATION and OPERATION of the PD-Net Organizer

This PD-Net Organizer is an optional product to control and set up a monitor via a network. Attach this product to the monitor and connect a network cable. By accessing the connected monitor using the web browser on your computer, the monitor can be controlled and set up remotely.

This product is only used for Plasma Monitors that have a terminal for the PD-Net Organizer.

This manual explains the installation of the PD-Net Organizer and its operation.

Installation...

[Page 8: Flow Of Installation](#)

Installation Flow of installation The following are instructions for attaching this product to the monitor and connecting it to the network. Please review the entire procedure to become familiar with it. Check package (p.9) Please check the contents of a package. This product contains a network board, an interface cable, and an owner's manual (this manual).

[Page 9: Name And Function Of Each Part](#)

Name and function of each part Name and function of each part Network Board Power indicator This illuminates red when the network board is mounted onto the monitor and the AC plug is connected . Serial port Connecting the Serial cable. LAN port LINK indicator (Orange) Connecting the LAN cable.

[Page 10: Mounting](#)

Installation [1] Mounting Disconnect the AC plug from the monitor. Remove 2 screws on the back of the cabinet, and then remove the terminal cover. Terminal Cover Insert the network board into the monitor, and fix it with 2 screws removed at step 2. Caution The AC cord must be disconnected from AC power outlet when mounting or removing this product.

[Page 11](#) Mounting Insert the output cable to the monitor (input port). Set the Option Switch from the Center position to the Top position. Center Cannot use the serial port of the monitor in this position. Set back to the Center Position position when the network board is not used.

[Page 12: Connection Of Lan Cable](#)

Installation [2] Connection of LAN cable To connect to the network, it is required to use the UTP (Unshielded Twisted Pair) straight cable with RJ-45 plug. There are two different types of cables depending on whether the network is constructed with 10Base-T or 100Base-TX. Prepare the Hub (10Base-T or 100Base-TX) to distribute the network cable if required.

[Page 13: Network Configuration](#)

Network configuration [3] Network configuration When you connect a monitor to a network, the network number of monitor must be the same as the network you intend to connect. You should configure monitor's network first. Make sure that the monitor is connected to the network correctly. To configure the network, use the computer.
