Page 4: Installing Your Router

Installing your router 1. Prepare the setup requirements. To set up your wireless network, you need to meet the following requirements: • A mini SIM/USIM card with WCDMA and LTE subscription IMPORTANT! Ensure that your SIM/USIM card is subscribed to WCD- MA and LTE services. Contact your mobile service provider about these services.

<u>Page 5</u> 2. Set up your LTE wireless router. Wall Power Outlet Power Computer a. Install the two 3G/4G antennas. b. Insert the SIM/USIM card into the USIM card slot. When the SIM/USIM card is properly installed, the Mobile Broadband LED lights up and flashes slowly. c.

Page 6 1. Enable the Wi-Fi function on your wireless client for it to automatically scan for wireless networks. 2. Select the wireless network named "ASUS" or "ASUS_5G", which is the default wireless network name (SSID) of ASUS wireless routers. NOTE: You can use either 3G/4G or wired connection for Internet access.

<u>Page 7</u> 3. Assign your router login name and password and click Next. You need this login name and password to log into 4G-AC55U to view or change the router settings. You can take note of your router login name and password for future use.

<u>Page 8</u> ASUS AiCloud app provides you with access to your data wherever and when- ever you have an Internet connection. It also allows you to access your ASUS WebStorage account via the AiCloud mobile app on your iOS or Android device, or via a web browser.
