Page 7: Chapter 1 Getting Started

Chapter 1 Getting Started Introducing MyPal ® The ASUS ® bundled with the Microsoft ® Windows Mobile ® 5.0 plus a host of useful utilities, you have everything you need in your pocket! SD card slot. Front features LCD touch screen...

Page 8: Back Features

• 4-way navigation button - functions like the four arrow keys on a keyboard. This button allows you to move through the program icons, If ASUS ® MyPal is bundled with GPS map software, you may use the • Launch button - functions like the enter/return key on a keyboard.

Page 9: Left Side Features

NOTES As a precaution, the Power button is automatically disabled when you remove the battery cover. You can only turn on the power when the battery cover is installed to the unit. The battery cover is removable, and allows you to remove or replace the main battery.

Page 10 NOTE To shutdown the device, press the Power button for about four seconds then tap Yes Bottom features Stylus Infrared (IR) Port Reset switch • Reset switch - allows you to perform a soft reset in case the device malfunctions, or when an application hangs. Press the tip of the stylus on this switch to reset the system.

Page 11: Installing And Removing The Battery

Installing and removing the battery NOTE Opening the battery cover automatically turns off the power. There is a mechanism at the upper left side of the battery compartment that switches the power off automatically when you slide out the battery cover. This is a safety measure for protecting the power circuitry, so please make sure not to lose the battery cover.

Page 12: Setting Up Gps

NOTE As soon as the power cable is connected to a power source, the battery will start charging and the power LED will show a steady red light. See “Changing the battery power settings” Setting up GPS (MyPal A696/A686 only) To use the GPS car kit: NOTE For optimal GPS signal performance, we recommend...

Page 13: Additional Storage

Additional storage card slot can be inserted with SD or MMC memory cards. It also supports Installing and removing SD/ MMC/SDIO card 1. With the label side (usually the side with the card manufacturer’s name) face up, and the barcode/serial number side face down, insert the card into the SD card slot located on top of the device.

Page 14: Activating Mypal

Activating MyPal You need to properly calibrate and activate your device before using it. This process ensures accurate positioning when entering text and selecting menus. Calibrating and activating your device 1. Press the power button. Power button or after performing a clean reset. Tap anywhere on the screen to continue.

Page 15: Basic Screens On Mypal

Page 84: Chapter 8 Bluetooth

® Chapter 8 Bluetooth Bluetooth is a short-range wireless communications technology. Devices with Bluetooth capabilities can exchange information without requiring a physical connection. Unlike infrared, you do not need to line up devices to exchange information through Bluetooth. The devices only need to be within a range of about 10 meters (30 feet) in an open space environment.

Page 85: Bluetooth Settings

Bluetooth settings 1. Tap > Bluetooth Settings. Settings screen to access and modify various settings. General Accessibility Allows you to: Allows you to: • Select or create a user your Pocket PC as a Bluetooth device. • Check the Bluetooth status (ON/OFF).

Page 86: Bluetooth Manager

• Serial Port - indicates the serial port address assignments. Tap Advanced to check the current serial port addresses. These cannot be changed. See the section “Remote device services” for details. • Personal Network Server - allows hosting of a Bluetooth-based personal area network.

Page 87 To launch the Bluetooth Connection Wizard: 1. Tap New from the Bluetooth Manager Menu bar. The screen appears. you want to set up. Tap Next. 3. Follow the on-screen instructions to set up the connection. NOTE Refer to the device online help for more information on Bluetooth.

Page 88: Remote Device Services

Remote device services Wireless serial port Using a Bluetooth serial port is equivalent to using a physical serial cable connection between two devices. As with a physical connection, you have 1. Tap > Bluetooth Settings > Services tab. Serial Port. 3.

Page 89 5. On the second Bluetooth connection screen, enter a name for the connection, dial-up phone number, and the other prompted information. Then tap ok. 6. Enter the required information on the succeeding screens. Bluetooth File Explorer connection is established. This feature allows you to do the following: •...

Page 90 To change the remote device folder: 1. To move down in the directory structure of the remote device, tap the New Folder from the main window of Bluetooth File Explorer. up in the directory structure of the remote device, tap the down-arrow to the right of the currently selected folder and select the New Folder from the drop-down list.

Page 91 3. From the File menu, tap Get. Get from the pop-up menu. bottom of the screen. Delete. 3. Tap ok Delete from the pop-up menu 1. From the Tools menu, tap Set Local Folder. folder. 3. Tap ok to return to the main screen of the Bluetooth File Explorer. selection.

Page 92 Send via Bluetooth You can conveniently send your Outlook contacts, calendar items, and tasks individually or collectively to the remote device via Bluetooth. To send data via Bluetooth: 1. Tap , then open either Contacts, Calendar, or Tasks. to the remote device, then tap Send via Bluetooth from the pop-up menu.

Page 93 Bluetooth Personal Area Network A Bluetooth personal area network is a private, temporary, ad-hoc network of up to eight (8) devices. A Bluetooth personal area network allows you to easily exchange information that normally requires a TCP/IP network. Most chat utilities, multi-player games, etc. are fully functional in a Bluetooth personal area network environment.

Page 94: Setting Up High Quality Audio Setup Or Hands-Free/Headset Setup

To join a personal network: 1. In the Bluetooth Manager, tap New > Join a personal network. Join a personal network, then tap Next. 3. Select the host of the personal network, then tap Next to establish a connection to the personal area network. If you are asked to enter the IP network

settings, select Use server-assigned IP address, then tap ok.

Page 95: Chapter 9 Wi-Fi
