4. Night Setback Mode

In Cooling Mode:

0I-201-15EG

Downloaded from

www.Manualslib.com

Operation with the Remote Control Unit (continued)

Night Setback Mode is used for saving energy.

Press the NIGHT SETBACK button while operation.

The

mark appears in the display.

To release the night setback function, press the NIGHT SETBACK button again.

The night setback mode cannot be used during automatic operation.

NOTE

(

)

When the night setback mode is selected, the air conditioner automatically raises the temperature setting 2 °F when 30 minutes have passed after the selection was made, and then another 2 °F after another 30 minutes have passed, regardless of the indoor temperature when night setback was selected. This enables you to save energy without sacrificing comfort. This function is convenient when gentle cooling is needed.
