Using the 1-Hour OFF Timer

This function causes the unit to operate for one hour and then stop, regardless of whether the unit is on or off when this button is pressed.

The indicator in the display indicates that this function is operating.

Setting procedure:

Regardless of whether the unit is operating or stopped, press the 1 HR. TIMER button.  appears in the display. 

Cancellation procedure:

Press the ON/OFF operation button to turn the unit off, wait for the unit to stop operating, and then press the ON/OFF operation button again. The 1-Hour Timer function is now cancelled and the unit operates normally. If, while the 1-Hour Timer function is operating, the 1 HR. TIMER button

NOTE

is pressed once to cancel the function and then again, the unit continues to operate for one hour from that point in time and then stops.

The Program Timer and 1-Hour OFF Timer may be used together.

It is not possible to use the OFF Timer and 1-Hour OFF Timer together.

Timer

Whichever function is set last takes precedence.

If the 1 HR. TIMER button is pressed while the TIMER OFF function operates, the OFF Timer is cancelled and the unit will stop operating one hour later.
