[Page 9: Initial Set Up](#)

8LIECH-SC-SSS-5L-W Initial Set Up If you did not transport the water cooler laying on its side you can bypass instructions in (12). NOTE: Do NOT plug in until steps 11-19 are completed. 8. If unit was transported on its side, then make sure unit is in the OFF position and is upright for at least four hours prior to plugging the unit in.

[Page 10: Clean Out Of The Box](#)

8LIECH-SC-SSS-5L-W 14. Push down the probe head until it is seated. 15. Push bottle into compartment and close the door. Ensure the plastic tubing is not interfering with the door. 16. Plug power cord into the wall outlet. NOTE: At initial set up it will take less than three minutes to fill reservoirs with water. If the pump stops prematurely, please open and close the door to activate the door switch reset.

[Page 11: Operation](#)

8LIECH-SC-SSS-5L-W Rinsing 9. Fill bottle with 2 gallons of tap water. 10. Insert probe assembly, place bottle into water cooler and close the door. 11. Allow cooler to be filled with water. 12. Drain water out as in steps 10, 11 and 12.

[Page 12: Dispensing Cold Water](#)

8LIECH-SC-SSS-5L-W Turn the switches at the back of the dispenser to ON. • The red switch controls the hot water. If you do not want hot water, leave this switched OFF. • The blue switch controls the cold water. If you do not want cold water, leave this switched OFF.

[Page 13: Dispensing Hot Water](#)

8LIECH-SC-SSS-5L-W Dispensing Hot Water NOTE: After setup, hot water will be available in 15-20 minutes. 1. Position the container you are wishing to fill with water, securely below the hot water tap. • The left triangle below the hot water control indicates the location of the hot water PARTS &...

[Page 14: Proper Care & Descaling](#)

8LIECH-SC-SSS-5L-W • Push the probe down until it is seated. • Slide the bottle onto the tray and close the door completely. PROPER CARE & DESCALING General Cleaning Perform: As needed Time Required: Fifteen minutes. NOTE: Do NOT use abrasive materials or chemical cleaners.

[Page 15: Descaling Procedure](#)

8LIECH-SC-SSS-5L-W • For descaling less frequently than once a year, use undiluted white vinegar. Descaling Procedure 1. Fill a bucket or empty 5-gallon water bottle with solution of white vinegar. For proportions, refer to the instructions above. Choose quantity in accordance with the frequency of your treatments.

[Page 16: Faq-Frequently Asked Questions](#)

8LIECH-SC-SSS-5L-W When the LED light is flashing it indicates that the heating system is working. When the LED light is constantly lit, it indicates that the hot water is ready. When the LED light is off it shows that the heating system is off.

[Page 17](#) 8LIECH-SC-SSS-5L-W Q3. I can't find the rectangular bottles? What other kind of bottles does the cooler take? The cooler will accept any standard three or a five gallon water bottle, circular or rectangular. Q4. How do I know when and if the Self Cleaning function is working? The self cleaning function will run every four hours and the self clean LED light will flash.

[Page 18](#) Q16. The warrant has expired and the cooler is out of warranty. Please call 1-855-594-4755 or email your request to Whirlpool@electrotemp.com. Q17. Hot water tap is dripping. Perform de-scaling procedure outlined in cleaning section.

[Page 19](#) 8LIECH-SC-SSS-5L-W Q20. The buttons for dispensing water are slow-moving or jammed. Ensure that buttons are clean and no dust or particles are causing buttons to move slowly. Q21. Dispenser is not operating. Make sure that the power cord is properly connected to a working outlet.

[Page 20](#) 8LIECH-SC-SSS-5L-W Q27. The dispenser is noisy. Make sure the cooler is properly levelled using the two adjustable feet at the back of the unit. Q28. Water tastes bad. • Drain the water from the reservoirs and replace the bottle with a fresh one.
