Charging your ASUS Phone

To charge your ASUS Phone:

1. Connect the USB connector into the power adapter's USB port.
2. Connect the other end of the micro USB cable to your ASUS Phone.
3. Plug the power adapter into a wall socket.

IMPORTANT!

- When using your ASUS Phone while it is plugged to a power outlet, the grounded power outlet must be near to the unit and easily accessible.
- When charging your ASUS Phone through your computer, ensure that you plug the USB cable to your computer's USB 2.0 port.
- Avoid charging your ASUS Phone in an environment with ambient temperature of above 35°C (95°F).

NOTES:

- For safety purposes, use ONLY the bundled power adapter and cable to avoid damaging your device and prevent the risk of injury.
- For safety purposes, use ONLY the bundled power adapter and cable to charge your ASUS Phone.
- The input voltage range between the wall outlet and this adapter is AC 100V - 240V.
- The output voltage of the micro USB cable is +5.2V 1A, 5.2W.

First Edition/ January 2017

Model: ASUS_A007 (ZB501KL)

Before you start, ensure that you have read all the safety information and operating instructions in this User Guide to prevent injury or damage to your device.

NOTE: For the latest updates and more detailed information, please visit www.asus.com.

Front features

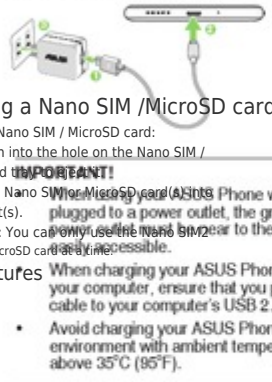
Installing a Nano SIM /MicroSD card

To install a Nano SIM / MicroSD card:

1. Push a pin into the hole on the Nano SIM / MicroSD card tray to eject it.
2. Insert the Nano SIM or MicroSD card(s) into the card slot(s).

IMPORTANT: You can only use the Nano SIM2 card or the MicroSD card at a time.

Side features



NOTES:

CE RF Exposure Compliance

This device meets the EU requirements (1999/519/EC) on the limitation of exposure of the general public to electromagnetic fields by way of health protection.
For body-worn operation, this device has been tested and meets the ICNIRP guidelines and the European Standard EN 62209-2, for use with dedicated accessories. SAR is measured with this device at a separation of 0.5 cm to the body, while transmitting at the highest certified output power level in all frequency bands of this device. Use of other accessories which contain metals may not ensure compliance with ICNIRP exposure guidelines.

CE Mark Warning

CE marking for devices with wireless LAN/ Bluetooth

This equipment complies with the requirements of Directive 1999/5/EC of the European Parliament and Commission from 9 March, 1999 governing Radio and Telecommunications Equipment and mutual recognition of conformity. The highest CE SAR values for the device are as follows:

- 0.51 W/kg@10g (Head)
- 1.58 W/kg@10g (Body)
