6-5. Wiring System Diagram for Multiple Remote

Control

When Installing Multiple Remote Controllers

This multiple remote controller system is used for operating the unit(s) at different positions. (A maximum of 2 remote controllers can be installed.)

Setting method

To execute this control, make the setting according to the following procedure.

(1) Of the two installed remote controllers, make one the main remote controller (factory-shipped state).

(2) On the other remote controller, change the address connector on the PCB from main to sub

position.

In this state, it functions as a sub-remote controller.

Install wiring correctly

(incorrect wiring will damage

CAUTION

the equipment).

To operate 1 indoor unit with 2 remote controllers set at different places.

6-6. How to Switch the Indoor Temperature Sensor

The indoor unit and the remote controller both contain an indoor temperature sensor. The sensors on either unit can be used but normally only the sensor set on the indoor unit is used. However, use the following procedure if you must use the sensor on the remote controller.

(1) Hold down the + 4 seconds.

Note: The Unit No. first displayed is the main indoor unit address for group control.

Note: Do not press the

(2) Select CODE NO. 32 with the Temp.setting ()

/ buttons.

(3) Change the set data from 0000 to 0001 with the Timer ()

/

(4) Press the button. (Setting is OK if the blinking display changes to a lit up display.)

(5) Press the button.

This is the usual off condition. At this time, (remote controller) appears on the LCD display. CL

NOTE

1 *

If using 2 remote controllers, either one (main or sub-remote controller) can be used to make setting but only the main unit functions as the remote controller sensor. UNIT.

*

2 The remote controller sensor will not function during group control unless the group address is set in the main remote controller indoor unit.
