Rotate the Focus Lever to adjust the focus of the image. Auto Setup Function Auto setup function is provided to automatically correct Keystone distortion according to the projector's tilt and adjust the computer display parameters (Fine sync, Total dots, and Picture position) by just pressing the AUTO SETUP/CANCEL button on the top control or the AUTO SET/CANCEL button on the remote control.

Page 27: Sound Adjustment

Sound Adjustment Direct Operation Volume Press the VOLUME+/- buttons on the top control or on the remote control to adjust the volume. The volume dialog box appears on the screen for a few seconds. Mute Press the MUTE button on the remote control to temporarily turn off the sound.

Page 28: Remote Control Operation

Basic Operation Remote Control Operation Using the remote control for some frequently used operations is advisable. Just pressing one of the buttons enables you to make the desired operation quickly without calling up the On-Screen Menu. COMPUTER/VIDEO/NETWORK button Press the COMPUTER, VIDEO, or NETWORK button on the remote control to select the input source.

<u>Page 29</u> NO SHOW button Press the NO SHOW button on the remote control to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as "User" in the Logo selection (see page 49), the screen changes each time you press the NO SHOW button as follows.

Page 30: Computer Input

Computer Input Input Source Selection (RGB: Computer 1 (Analog)/Computer []) Direct Operation Choose either Computer 1 (Analog) or Computer 2 by pressing the INPUT button on the top control or press the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through Menu operation as described below.

Page 31: Input Source Selection (Rgb(Pc Digital), Rgb(Av Hdcp))

The specification of HDCP is decided and controlled by Digital Content Protection, LLC. Should the specification be changed, this projector may not display the digital content protected by HDCP. • Wired and Wireless are for the Network function. See owner's manual "Network Set-up and Operation"...

Page 32: Computer System Selection

Computer Input Computer System Selection This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, or UXGA with its Multi-scan system and Auto PC Adjustment. If a computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional settings.

Page 33: Auto Pc Adjustment

To store adjustment parameters The adjusted parameters from the Auto PC Adjustment can be stored in the projector. Once the parameters are stored, the setting can be done just by selecting a Mode (1–5) in the PC System Menu (see page 32). See also "Store" on page Notes:

...

Page 34: Manual Pc Adjustment

Computer Input Manual PC Adjustment Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC Adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has five independent memory areas to store those parameters manually adjusted. It allows you to recall the setting for a specific computer.

<u>Page 35</u> Display area H Use the Point buttons to adjust the horizontal area displayed by this projector. Display area V Use the Point buttons to adjust the vertical area displayed by this projector. Reset To reset the adjusted data, select Reset and press the SELECT button.

Page 36: Image Mode Selection

Image 3, and Image 4 by pressing the IMAGE button on the remote control. Dynamic For viewing pictures in a bright room. Standard Normal picture mode preset on the projector. Real Picture mode with improved halftone for graphics. Blackboard (Green) For the image projected on a blackboard.

Setting Setting This projector has a Setting menu that allows you to set up the other various functions described below. Press the MENU button to display the On-Screen Menu. Use the Point frame pointer to the Setting Menu icon. Use the Point...

<u>Page 48</u> Countdown Off ... Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

<u>Page 49</u> After capturing the projected image, go to the Logo select function and set it to "User". Then the captured image will be displayed the next time you turn on the projector or when you press the NO SHOW button (see page 29).

<u>Page 50</u> After entering the four-digit number, move the pointer to "Set." Press the SELECT button so that you can start to operate the projector. If you entered an incorrect Logo PIN code, "Logo PIN code" and the number (****) will turn red for a moment.

<u>Page 51</u> - When pressing the COMPUTER button or VIDEO button on the remote control. On2 ... Input search works under the following situation. - When turning on the projector by pressing the POWER ON/STAND-BY button on the top control or the remote control.

<u>Page 52</u> Eco ... Select "Eco" when you do not use the projector via network. The projector's network function will stop when turning off the projector. Refer to the owner's manual "Network Set-up and Operation".

Page 53 On start When this function is set to "On," the projector will be automatically turned on just by connecting the AC power cord to a wall outlet. Note: ✓ • Be sure to turn off the projector properly (see "Turning Off the Projector"...

<u>Page 54</u> Security (Key lock and PIN code lock, Alarm settings) This function allows you to use the Key lock and PIN code lock function to set the security for the projector operation. Key lock This function locks the top control and remote control buttons to prevent operation by unauthorized persons.

<u>Page 55</u> DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 80, AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED. Alarm This function allows you to configure the Alarm operation.

<u>Page 56</u> (p.23). L1 ... Normal operation L2 ... Slower and lower-sound than the normal operation (L1), but it takes more time to cool the projector down. Fan control Choose the running speed of cooling fans from the following options.

Page 57: Filter Counter

Filter counter This function is used to set a frequency for the filter cleaning. When the projector reached a specified time between cleanings, a Filter warning icon appears on the screen, notifying the cleaning is necessary. After cleaning the filter, be sure to select RESET and set the timer.

Page 58: Antitheft Alarm Function

• This function is not a guarantee against stealing. • The alarm does not ring while the AC power cord is connected to an outlet even if the projector detects vibrations. • The alarm will stop, as the AC power cord is connected to an outlet, except when the battery cover is open.

Page 59: Other Settings

Other settings Change the PIN code Press the F button and enter the four-digit PIN code number within about 10 seconds. The ALARM indicator blinks red for a few seconds and a high-pitched confirmation sound is produced. While the indicator is blinking, enter a new PIN code, then you will hear a high-pitched confirmation sound and the ALARM indicator is turned off.

Page 60 Replace the rechargeable batteries Use only the specified battery for this projector.

Using other types of battery may cause accident or fire hazard. Replacement Battery: SANYO Ni-MH BATTERY PACK Part No. 645 089 8587 How to replace the rechargeable batteries Unplug the AC power cord from a wall outlet.

Page 61

onumber If you do not use the projector or the Antitheft alarm function for a long period of time, remove the battery from the projector and store it in a place where the temperature is always between -4° F to 86° F (-20° C to 30° C).

Page 62: Maintenance And Cleaning

Maintenance and Cleaning Warning Indicator The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance. The projector is shut down and the WARNING indicator is blinking red .

Page 63: Cleaning The Filter

If a "Filter warning" icon appears on the screen, clean the filter immediately. Clean the filter by following the steps below.

Page 64: Attaching The Lens Cover

Maintenance and Cleaning Attaching the Lens Cover When moving this projector or while not using it over an extended period of time, replace the lens cover. Attach the lens cover according to the following procedures. Pass the string through a hole of the lens cover.

Page 65: Lamp Replacement

Lamp Replacement When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the lamp with a new one promptly. The timing when the LAMP REPLACE indicator should light is depending on the lamp mode.

Page 66: Resetting The Lamp Counter

Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service.

Page 67: Appendix

Appendix Troubleshooting Before calling your dealer or service center for assistance, check the items below once again. - M ake sure you have properly connected the projector to peripheral equipment as described on pages 19-21. - M ake sure all equipment is connected to AC outlet and the power is turned on. - W hen the projector does not project an image from the connected computer, restart the computer. Problem: No power The initial display is not shown. -Make sure "User" or "Countdown off" are not chosen at display function (see page 48) The initial display is not same - Make sure "User" or "Countdown off" are not chosen at Logo (select) as the default set. function (see page 48) Input signal switches automatically. - Make sure Input search function is adjusted properly. See page 51. (or does not switch automatically) When the projector is on and you - That is the Filter warning icon. Refer to page 57. press the input button, an icon other than the Lamp mode icon appears. An icon other than Input mode or -That is the Lamp replacement icon or the Filter warning icon. See Lamp mode icon appears. page 56 or 57. Image is out of focus. Image is Left/Right reversed. Image is Top/Bottom reversed. Picture is not bright enough. - Solutions - Plug the power cord of the projector into the AC outlet. - See if the POWER indicator lights red. - W ait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. See page 22. - Check the WARNING indicator. If the WARNING indicator lights red, projector cannot be turned on. See page 62.

<u>Page 68</u> - Press the Volume + button. See page 27. - Press the Mute button. See page 27. - When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available - Is the image projected? You will hear the sound only when the image is projected.

<u>Page 69</u> - Make sure no obstruction is between the projector and remote control. - Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4'(5 m). - Wireless reomete control does not work when the remote control cable is

<u>Page 70</u> High voltages are used to operate this projector. Do not attempt to open the cabinet . If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.
