Page 13 About the product's wireless LAN function Overview of the wireless LAN function

The product is equipped with a wireless LAN function that supports all or some of the following standards IEEE 802.11b, IEEE 802.11g, and IEEE 802.11n. • Wireless LAN function specifications Radio IEEE 802.11b, frequency...

Page 14 ■ Characteristics of wireless communications There is a correlative relationship between the communication range and transmission rate of wireless devices. The lower the transmission rate of the wireless communications, the broader the communication range. Memo The range of communications of a wireless device is affected if the antenna is placed near a ●...

Page 15 However, the broadcast energy has been suppressed to levels that are much lower than mobile telephones or other radio devices. Toshiba assures that the wireless LAN component built into this device can be used safely in accordance with the guidelines of the radio frequency safety standards and recommendations.
