Removing the side cover

3

4

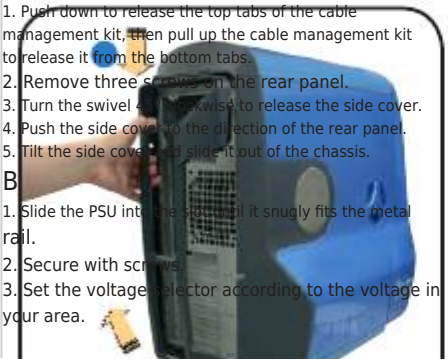
English

A

1. Push down to release the top tabs of the cable management kit, then pull up the cable management kit to release it from the bottom tabs.
2. Remove three screws on the rear panel.
3. Turn the swivel [illegible] clockwise to release the side cover.
4. Push the side cover to the direction of the rear panel.
5. Tilt the side cover and slide it out of the chassis.

B

1. Slide the PSU into the slot until it snugly fits the metal rail.
2. Secure with screws.
3. Set the voltage selector according to the voltage in your area.



C

1. Push the marked portion of the Magic Mask
2. Remove the drive bay cover.
3. Slide the bay lock toward the
sign.
4. Insert the ODD into the bay.
5. Align the ODD holes with the bay holes, then slide
the bay lock toward the sign to secure the drive in
place.
6. Connect cables.
