Page 17: Chapter Two

Chapter Two STARTUP GUIDANCE Read this chapter first to make all necessary preparations. Installing the Recorder - Connections - Preparing your remote control - Setting up your recorder Viewing programs Turning off the recorder Status display...

Page 18: Installing The Recorder

The "RF 2 OUT" provides you a RF loop-through function to receive analogue TV programs as well as digital programs (for Integrated Digital TVs only). Use an RF coaxial cable (not supplied) to connect the HDD-J35 "RF 2 OUT" terminal to TV's or VCR's antenna input.

Page 19 For better video quality, it is recommended that you use the HDMI cable, the Mini D-Sub 15-pin cable or the RGBHV video cable (with 5 RCA connectors). These cables are not included in the HDD-J35 package. HD MODE Switch selection is essential for several outputs. Refer to the HD MODE Switch table on page 71 for making the correct switch selection according to your output connection.

<u>Page 20</u> TV. Set the HD MODE Switch (refer to page 12) to RGB, and then connect the Y/G, P recorder to the corresponding jacks on the TV. HDD-J35 HD VIDEO OUT HD MODE Note: This diagram illustrates video connections only. Refer to Page 22 for Audio connection.

<u>Page 21</u>: If your TV has component video inputs, use the component video cable included in the HDD-J35 accessory box. Set the HD MODE Switch (refer to page 12) to YP connect the Y/G, P /B and P corresponding jacks on the TV.

<u>Page 22</u> (f) Composite video connection: If your TV has composite video inputs, use the yellow connector of the Audio/Video cable included in the HDD-J35 accessory box. Connect the yellow video connector from "SD VIDEO OUT" on the rear of the recorder to the corresponding jack on the TV.

Page 23: Connecting To Dvd Player

A cable box, satellite box or VCR can be connected to this recorder through the Composite Video and Stereo Audio input connectors located at the back of the HDD-J35 recorder. Use a composite Audio/Video cable to connect from the Cable Box/Satellite Box/VCR's Video/L/R output to the HDD-J35 Video/L/R input connectors.

Page 24: Connecting To Vcr (For Archiving)

A VCR can also be connected to this recorder through the Composite Video and Stereo Audio output connectors located at the back of the HDD-J35 recorder for archiving programs from the HDD. Use a composite Audio/Video cable to connect from the HDD-J35 Video/L/R output connectors to the VCR's Video/L/R input.

Page 25: Connecting To Mains Supply

CONNECTING TO MAINS SUPPLY Plug the recorder into the mains. W all O utlet The above diagram is illustrated with an Australian power plug. In other regions, use the appropriate power plug. STEP B: PREPARING YOUR REMOTE CONTROL Loading batteries.

<u>Page 26</u> Notes on batteries Improper use of batteries may cause battery leakage and corrosion. To operate the remote control correctly, follow the instructions below. Do not insert batteries into the remote control in the wrong direction. Do not charge, heat, open, or short-circuit the batteries. Do not throw batteries into fire. Batteries contain toxic substances.

Page 27: Step C: Setting Up Your Recorder

STEP C: SETTING UP YOUR RECORDER Note: If your service provider or antenna installer has already installed your TV system to receive terrestrial TV programs, do not change any connections of those devices or installation settings unless it is absolutely necessary.

Page 28 You will see the Main Menu (page 33). Press the "" button twice to highlight "INSTALLATION" and then press "ENTER". When prompted, enter "0000" which is the default password. To tune the recorder, you have choices of MANUAL SETUP / AUTO SCAN / QUICK SCAN. We recommend that you use "QUICK SCAN"...

Page 29: Viewing Programs

VIEWING PROGRAMS . After you have tuned the recorder, you have several ways to navigate through all programs: — Press the "CHANNEL NUMBER" or "CHANNEL UP/DOWN" buttons to select a program of your interest. — Press the "TV/RADIO" button to call up the "Program List" (page 48) and select a program of your interest.

AUDIO Press the AUDIO button on the remote control. Use the "" and "" buttons to select the preferred audio format present in the program you are watching. Press the "EXIT" button to cancel the list. RECALL The "RECALL" button is used to toggle between present and previous programs In the case you are viewing Program A, and then you change to Program B.

Page 55: Chapter Four

Chapter Four RECORDING Recording Methods OTR (One Time Recording) Time Based Recording EPG Recording...

Page 56: Recording Methods

RECORDING METHODS With dual built in tuners, this recorder allows up to two recordings to take place at the same time. However, it is to be reminded that schedules of recordings have to be carefully planned so as to avoid any conflicts between different entries.

Page 57: Time-Based Recording

TIME-BASED RECORDING Use the REC MENU to program a recording. It will take less time to prepare, as it provides all necessary information for recording. Before recording, ensure that there is sufficient space remaining in the HDD. Delete unwanted files or archive some files using VCR to create space for recording.

Page 58: Epg Recording

Note: A conflict occurs when the start time of a new entry clashes into the duration of two existing entries occupying the same time slot or when there is an attempt to duplicate an existing entry. To stop any recording in progress: 1) Press the "REC MENU"...

<u>Page 59</u> A pop-up menu appears prompting for recording frequency. Use the "" and "" buttons to select either "Once", "Daily" or "Weekly" and press the "ENTER" button to confirm selection. (Program selected for recording will create an entry in the REC MENU list as well) If the program selected for recording results in conflict...

Page 73: Glossary

4 GLOSSARY APPENDIX * Aspect Ratio: It is the ratio of the width of the screen to the height. The two relevant digital TV formats are 16:9 (wide-screen) or 4:3 (the traditional screen ratio). 16:9 is more ergonomically suitable for the human eye. * Bandwidth: It is the frequency range that allows for carrying a certain radio signal.

<u>Page 74</u> For High Definition (HD), the minimum picture resolution is 720×576 , progressive (576p) Other HD formats are 1920×1080 i and 1280×720 p. * UHF: Stands for "Ultra High Frequency", starts from 300 to 3000MHz corresponding to channels 13-69, including Bands IV and V.
