Introduction

Welcome to the world of powerful and portable multimedia computers!

Some software may differ from its retail version (if available), and may not include user manuals or all program functionality.

Your Computer model may be ENERGY STAR

model you purchased is compliant, it is labeled with the ENERGY

®

STAR

applies.

Toshiba is a partner in the Environmental Protection Agency's (EPA) ENERGY STAR

to meet the latest ENERGY STAR

efficiency. Your computer ships with the power management options preset to a configuration that will provide the most stable operating environment and optimum system performance for both AC power and battery modes.

To conserve energy, your computer is set to enter the low-power Sleep mode which shuts down the system and display within 15 minutes of inactivity in AC power mode. We recommend that you leave this and other energy saving features active, so that your computer will operate at its maximum energy efficiency. You can wake the computer from Sleep mode by pressing the power button. See the "Mobile Computing" section of the Toshiba User's Guide for more information on using power management settings to conserve computer energy.

According to the EPA, a computer meeting the new ENERGY STAR

depending on how it is used. If all U.S. household and businesses replaced old computers with new ENERGY STAR models, we would save more than \$1.8 billion in energy costs over the next five years and avoid greenhouse gas emissions equivalent to more than 2.7 million cars.

If every computer purchased by businesses next year met the new ENERGY STAR

\$210 million over the lifetime of those models. That is equivalent to lighting 120 million square feet of U.S. commercial building space each year.

During 2006 Americans, with the help of ENERGY STAR about \$14 billion dollars on their utility bills and avoided

greenhouse gas emissions equivalent to those from 25 million vehicles.

Visit <http://www.energystar.gov> or <http://www.energystar.gov/powermanagement> for more information regarding the ENERGY STAR logo on the computer and the following information

® specifications will use between 20% and 50% less energy

® requirements.  businesses would save more than Program and has designed this computer

® guidelines for energy

Introduction

® compliant. If the

® qualified

®, saved

® Program.
