Moving the computer

Moving the computer

Before moving your computer, even across the room, make sure all drive activity has ended (the drive indicator light stops glowing) and all external peripheral cables are disconnected.

Mobile computing

Your computer contains Toshiba EasyGuard

EasyGuard* technology is made up of four foundational elements that incorporate hardware and software innovations into various Toshiba computers that address the most common security, reliability and connectivity issues faced by computer users:

- ❖ EasyGuard Protect and Fix—to fortify vital information and

vulnerable components against the stress and hazards mobile computers face every day.

- ❖ EasyGuard Secure—to defend your data and your computer against loss, theft or viral attack.

- ❖ EasyGuard Connect—to help users establish a reliable wired

or wireless connection effortlessly and quickly.

- ❖ EasyGuard Optimize—to enable users to customize system settings to be more productive.

*Toshiba EasyGuard

some of which may or may not be available on a particular Toshiba computer depending on the model selected. See easyguard.toshiba.com for detailed information.

Running the computer on battery power

Battery life may vary considerably from specifications depending on product model, configuration, applications, power management settings and features utilized, as well as the natural performance variations produced by the design of individual components.

Published battery life numbers are achieved on select models and configurations tested by Toshiba at the time of publication.

Recharge time varies depending on usage. Battery may not charge while the computer is consuming full power.

After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see the accessories

information included with your computer or visit the Toshiba Web site at accessories.toshiba.com. Use only batteries designed to work with your Toshiba computer.

Do not pick up the computer by its display panel or by the back (where the ports are located). Doing so could damage the system.
