Updating the Atheros

AR5004X/AR5004G Wireless

Network Adapter Software on **TOSHIBA** Your Toshiba Computer

For systems with the Atheros AR5004X/AR5004G wireless network adapter, turning the wireless antenna switch on or off while your computer is in _____

Suspend or Hibernation Mode may prevent the wireless device from operating when you Resume using the computer.

To correct this situation, you will need to update the wireless adapter driver using the following procedure:

1

Log onto the computer with Administrator privileges.

If you are recovering your system using the Recovery media that shipped with your computer, be sure to use this procedure to update the wireless network adapter driver after completing the recovery.
