How does a cable modem connect to a computer? What is DOCSIS? Getting Started What's in the box? Front side LEDs...

[Page 4: Congratulations On Your Purchase](#)

Congratulations on Your Purchase! Your new Toshiba DOCSIS Cable Modem will provide you with high-speed access to the Internet through your cable TV (CATV) network- accesses at a fraction of the time it takes traditional telephone modems. In addition, your service will be always connected. Those two features give you the information you want, when you want it

[Page 5: Important Rules For Safe Operation](#)

Important Rules for Safe Operation In addition to the careful attention devoted to quality standards in the manufacture of your Toshiba DOCSIS Cable Modem, safety is a major factor in the design of every product. However, safety is your responsibility, too.

[Page 6: Use](#)

Do Not Use Near Water - Do not use this product near water - for example, near a bath tub, sink or laundry tub, in a wet basement or near a swimming pool, and the like. Do Not Place Near High Temperature Source - for example near a steamer, Kitchen range fire, and the like.

[Page 7: Service](#)

Service Do Not Remove Covers - Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel. Unplug this product from the wall outlet carefully, as the AC adaptor may be hot. Refer Servicing to Qualified Service Personnel Under the Conditions Listed Below

[Page 8: Overview](#)

Overview The modem provides you with high-speed data communications over the television cable network by following the widely accepted DOCSIS/MCNS standards being developed by the Multimedia Cable Network System (MCNS) consortium. Those standards offer a combination of high performance and interoperability among many of the cable system operators in North America.

[Page 9: What Is Docsis](#)

What is DOCSIS? Data Over Cable Service Interface Specifications. DOCSIS defines interface requirements for cable modems involved in high-speed data distribution over a cable television network.

[Page 17: Q & A](#)

Q & A Q: How to connect the cable modem to the hub/switch with the 10BASE-T? A: Cable Modem is connected to the uplink port on the hub/switch, or use cross-over Ethernet cable to connect the normal port on the 10BASE-T hub/switch.

[Page 18](#) Q: Where can I download the driver for Cable modem? A: In case of use 10BASE-T

interface, the Cable Modem is a stand-alone device that has a 10BASE-T port. All workstations or hub must have a 10BASE-T port or card to connect to the Cable Modem.

[Page 19: Regulatory](#)

Regulatory <>FCC Notice: This equipment has been tested and found to comply with the limits for a Class B personal computer and peripherals, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

[Page 20: Glossary](#)

10BASE-T LAN cable. F c o n n e c t o r A type of coaxial connector, labeled RF on the rear of the Toshiba Cable Modem, that connects the modem to the cable system. H e a d e n d The equipment, in the central office of the service provider, where the cable signals originate.

[Page 21](#) Connector on the Toshiba Cable Modem, labeled 10BASE-T, that connects the modem to a computer or to a HUB. Subscriber A computer user in the home who accesses a data service using the Toshiba Cable Modem. S u b n e t A network subdivision.

[Page 22: Installing The Cable Modem](#)

Installing the Cable Modem To avoid thermal problems, allow at least one inch spacing between the ventilation holes and any object to either side of the unit. It's best to have no obstructions on top of the unit. The top of the unit should be at least two inches from any obstruction. Connect the cable modem using the following steps, referring to the figure below.
