Tray Busy The LED lights green or amber when the drive is operating (LED is amber when drive is writing.) Indicator The Eject button is used to open the disc tray so you can install or remove a disc.

[Page 5: Setup](#)

Toshiba's SD-R2102 drive does not require any unique device drivers for Windows '98/2000/XP/NT. After installing your drive and re-booting, your system should recognize your drive. Win '98/2000/XP/NT Operating Systems support all Toshiba's ATAPI drives natively. If you prefer using DOS, download the ATAPI driver from our web site.
