The integrated Touch Pad and control buttons in the palm rest allow control of the on-screen pointer and support functions such as the scrolling of windows.

The computer is powered by one rechargeable lithium-ion battery pack.

The internal RTC battery backs up the Real Time Clock (RTC) and calendar.

The AC adaptor provides power to the system and recharges the batteries when they are low.

It comes with a detachable power cord which will either have a 2-pin or 3-pin plug enclosure.

As the AC adaptor is universal, it can receive a range of AC voltages from 100 to 240 volts, however you should note that the output current varies among different models. Using the wrong adaptor can damage your computer. Refer to the

[AC adaptor](#)

section in Chapter 2,

This port provides 15-pin, analog VGA port. This port allows you to connect an external monitor to the computer. Some models include this feature.

The computer supports multiple Universal Serial Bus ports that comply with the USB 2.0 standard.

One of the USB ports has an eSATA (External Serial ATA) function.

This slot lets you insert an SD™/SDHC™ memory card, miniSD™/microSD™ Card, Memory Stick

®

(PRO™) and MultiMediaCard™.

Refer to Chapter 8,
