Introduction SAFETY PRECAUTIONS CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-
SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, do not expose this appliance to rain or

moisture.

[Page 3: Important Safeguards](#)

IMPORTANT SAFEGUARDS 1. READ INSTRUCTIONS All the safety and operating instructions should be read before the unit is operated. 2. RETAIN INSTRUCTIONS The safety and operating instructions should be retained for future reference. 3. HEED WARNINGS All warnings on the unit and in the operating instructions should be adhered to. 4.

[Page 4](#) Introduction IMPORTANT SAFEGUARDS 13. LIGHTNING To protect your unit from a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the unit due to lightning and power line surges.

[Page 5: Power Source](#)

IMPORTANT SAFEGUARDS 19. REPLACEMENT PARTS When replacement parts are required, be sure the service technician uses replacement parts specified by the manufacturer or those that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards. 20.

[Page 6: Precautions](#)

Introduction Precautions Notes on handling When shipping the DVD/VCR, the original shipping carton and packing materials come in handy. For maximum protection, repack the unit as it was originally packed at the factory. Do not use volatile liquids, such as insect spray, near the DVD/VCR.

[Page 7: Playable Discs](#)

Because of problems and errors that can occur during the creation of DVD and CD Software and/or the manufacture of DVD and CD discs, Toshiba cannot assure that the DVD player will successfully play every disc bearing DVD and CD logos. If you happen to...

[Page 8](#) Introduction Notes and Informations (Continued) Notes on region numbers The region number of this DVD/VCR is 1. If region numbers, which stand for their playable area, are printed on your DVD video disc and you do not find , disc playback will not be allowed by the player.

[Page 16: Connections](#)

Connections Antenna connections If you are using an antenna system, follow these instructions. If you are a Cable TV subscriber, skip ahead to page for the proper connections. Antenna to DVD/VCR connection The DVD/VCR must be connected "between" the antenna and the TV. First, disconnect the antenna from the TV and connect it to the DVD/VCR.

[Page 17](#) DVD/VCR to TV connection After you have connected the antenna to the DVD/VCR, you must connect the DVD/VCR to the TV. Below are 3 common methods of connecting your DVD/VCR to a TV. Find the type of TV you are using and follow the connection diagram.

[Page 18: Cable Tv Connections](#)

Connections Cable TV connections Many cable companies offer services permitting reception of extra channels including pay or subscription channels. This DVD/VCR has an extended tuning range and can be tuned to most cable channels without using a cable company supplied converter box, except for those premium channels which are intentionally scrambled. If you subscribe to a premium channel which is scrambled, you must have a descrambler box for proper reception.

[Page 19](#) IMPORTANT: Make sure the TV/CABLE menu option is set to the "CABLE" mode. This DVD/VCR cannot receive scrambled programs since it does not contain a descrambler. In order to receive scrambled programs, your existing descrambler must be used. Descrambler boxes are available from cable companies. Consult your local cable company for more information concerning connection to their descrambler equipment.

[Page 20: Connecting To A Tv](#)

Connections Connecting to a TV Connect the DVD/VCR to your TV. Note: This method transports VHS and DVD-video signals. For enhanced DVD-video performance, we recommend you to connect the S-video or ColorStream Basic connection Signal flow To wall outlet • Make sure following setting. Select: On-screen display "Digital Out"...

[Page 21](#) S-video output An S-Video connection is superior to Video (Yellow) output. Use this method for DVD playback when the connected television has S- Video input, and does not have component video inputs. Component video outputs PROGRESSIVE outputs Some TVs or monitors are equipped with component video inputs that are capable of reproducing a progressively scanned video signal.

[Page 22](#) Connections Connecting to a TV (Continued) About HDMI HDMI (High Definition Multimedia Interface) supports both video and audio on a single digital connection for use with DVD players, DTV, set-top boxes, and other AV devices. HDMI was developed to provide the technologies of High Bandwidth Digital Content Protection (HDCP) as well as Digital Visual Interface (DVI) in one specification.

[Page 23](#) The content of the output for each output jack are as shown in the following table and differ depending on User settings/operation. USER setting/operation HDMI Mode Output Output VCR/DVD Setting Interlace Progressive 480p 720p Interlace 1080i 480p 720p Progressive 1080i Interlace Progressive 480p...

[Page 24: Connecting To An Audio Equipment](#)

Connections Connecting to an audio equipment You can enjoy high quality dynamic sounds of

DVD video discs or audio CDs by connecting the DVD/VCR to optional audio equipment. For connection to your TV, see "Connecting to a TV" Connecting to an amplifier equipped with a Dolby Digital Dolby Digital is the surround sound technology used in theaters showing the latest movies, and is now available to reproduce this realistic effect in the home.

[Page 25](#) Warning When playing DTS-encoded discs (DVD video discs and audio CDs), excessive noise may be output from the analog stereo jacks. To avoid possible damage to the audio system, you should take proper precautions when the ANALOG AUDIO OUT (L/ R) jacks of the DVD/VCR are connected to an amplification system.

[Page 26: Connecting To A Usb Mass Storage](#)

Connections Connecting to a USB Mass Storage This unit can be used to read JPEG, WMA, MP3 and DivX accepts USB Mass Storage Class. For devices that are compatible with the unit's USB port, please refer to page Connecting to a USB Mass Storage Signal flow USB Mass Storage Notes:...

[Page 27: Basic Setup \(Vcr\)](#)

Basic setup (VCR) Setting the video channel When a TV is connected with the 75 ohm coaxial cable only. To view playback of a recorded tape or DVD disc, or to watch a program selected by the VCR's channel selector, the TV must be set to channel 3 or 4 (video channel).

[Page 28: Setting The Language](#)

Basic setup (VCR) Setting the language You can choose from three different languages (English, French and Spanish) for the on-screen display. Setting the language Preparation: • Turn ON the TV and select to the corresponding video input. • Press DVD/VCR to operate the DVD/VCR. • ...

[Page 29: Clock Setting](#)

Clock setting The AUTO CLOCK function will automatically set the built-in clock (Month, Day, Year and Time) when the DVD/VCR is connected to an Antenna or Cable system and it is turned off. The DVD/VCR searches for a station in your area containing the necessary AUTO CLOCK setting signals.

[Page 30](#) Basic setup (VCR) Clock setting (Continued) To set STANDARD TIME In the rare event that you live within broadcast range of two stations in two different time zones, the DVD/VCR may recognize the wrong station for the AUTO CLOCK setting. To correct the situation: Press VCR MENU.

[Page 31](#) If the AUTO CLOCK process did not set the date and time correctly, you must set them manually for timer recording and DAYLIGHT SAVING TIME. Manual clock setting EXAMPLE: Setting the clock to "8:30 AM" October, 28 (SAT), 2006. Press VCR MENU. Press SET + or -...

[Page 32: Tuner Setting](#)

Basic setup (VCR) Tuner setting This DVD/VCR is equipped with a channel memory feature which allows channels to skip up or down to the next channel set into memory, skipping over unwanted channels. Before selecting channels, they must be programmed into the DVD/VCR's memory. In addition to normal VHF and UHF channels, this DVD/VCR can receive up to 113 Cable TV channels.

[Page 33](#) To ADD/DELETE channels Repeat the step 1 on page . Then press SET + or - to select the "ADD/DELETE" and press ENTER. To Add or Delete channels 1) Press Direct channel selection buttons (0-9) or SET +/- to select a channel number you want to add or delete.

[Page 34: Playback \(Vcr\)](#)

Playback (VCR) Loading and unloading a cassette tape Use only video cassette tapes marked Loading Push the center of the tape until it is automatically inserted. Automatic power ON When you insert a cassette tape, the DVD/VCR power will turn ON automatically. Automatic playback When loading a cassette tape without an erase prevention tab, playback will start automatically.

[Page 35: Cassette Tape Playback](#)

Cassette tape playback To play a prerecorded tape. Playback Preparation: • Turn ON the TV and select the corresponding video input. • Press DVD/VCR to operate the DVD/VCR. • Press DVD/VCR SELECT to select the VCR mode. (The VCR indicator will light). Load a prerecorded

tape (When loading a cassette tape without the erase prevention tab, playback will start automatically).
