Note

When you press [PDN], the letter "I" (Intercom) is displayed on your LCD. It is the [PDN] that is used to automatically access internal dial tone before dialing the remaining numbers in the Speed Dial sequence (in our example that number is 9011813).

where:

- CO line access code.
- city code (example: Tokyo)

Station User

Stores the System Speed Dial information on Speed Dial Code 10.

690 – System Speed Dial Code that is linked.

9 – CO line access code.

Press
where:

Sp

To use the new Note When you press [PDN], the letter "I" (Intercom) is displayed. The [PDN] that is used to automatically access intercom is the [PDN] that is used to automatically access intercom when dialing the remaining numbers in the Speed Dial sequence. From your station, press the telephone number that number is 9011813). The telephone automatically dials the sequence code plus the local telephone number.

Chain Dialing Speed Dial Numbers

You can call two or more Speed Dial numbers during one call. This enables you to add additional parties (conference calls) to your conversation with Speed Dialing. It also allows dialing of a stored code, such as a credit card number, to send to a far-end computer.

Strata DK Digital Telephone 10/01

- System Speed Dial Code that is linked.
- international area code.
- country code (example: Japan)
- + **011** - international area code.
- + **81** - country code (example: Japan)
- + **3** - city code (example: Tokyo)
- + **10** - Station Speed Dial Code.
- + **690** - System Speed Dial Code being linked to Speed Dial Code 10.
- + **5876-9374** - local Tokyo telephone number.

To use the new link
From your station, press the **SD (10)** button or **Speed Dial** button to access a CO line, then the international dialing sequence code plus the local telephone number.

Chain Dialing Speed Dial Numbers

Features You can call two or more Speed Dial numbers during one call. You can add additional parties (conference calls) to your conversation with Speed Dialing. It also allows dialing of a stored code, such as a credit card number, to send to a far-end computer.
