USB floppy diskette drive

For further information, please refer to Chapter 3,
Options.

Problem

Drive does not operate Check the connection between the computer and
Some programs run  
correctly but others do
not

You cannot access the 
external floppy diskette

drive

PC Card

For further information, please refer to Chapter 3, *Options*.

Problem

PC Card error occurs

[User's Manual](#)

[TECRA A10/S10/M10/SatellitePro S300](#)

Procedure

the drive to ensure that it is properly attached.

The computer's software or hardware configuration may be causing a problem - ensure that these configurations match your requirements (refer to any relevant documentation, for example that supplied with any software in use, for further information).

Try another floppy diskette in the drive - if you are able to access this disk then it indicates the original disk and not the drive is probably causing the problem.

If you are still unable to resolve the problem, contact your reseller, dealer or service provider.

Procedure

Remove the PC Card from the computer and then reinsert it in order to ensure it is firmly connected.

In the event that the PC Card is attached to an external peripheral device, ensure that this connection is properly made.

If the problem persists, then you should refer to the documentation supplied with your PC Card for further information.

If you are still unable to resolve the problem, contact your reseller, dealer or service provider.
