Removing a Smart Card

To remove a Smart Card, follow the steps as detailed below:

1. Open the Safely Remove Hardware icon on the Windows Taskbar.

Before removing the Smart Card, confirm that the Smart Card is not working with any program or system.

Be careful not to bend the Smart Card while removing it from the computer.

2. Point to Smart Card and click the left Touch Pad control button.

3. Grasp the Smart Card and remove it.

Bridge media slot

The computer is equipped with a Bridge media slot that can accommodate some kinds of memory media with various memory capacities so that you can easily transfer data from devices, such as digital cameras and Personal Digital Assistants.

Keep foreign objects out of the Bridge media slot. Never allow metal objects, such as screws, staples and paper clips, to enter the computer or Keyboard. Foreign metal objects can create a short circuit, which can cause computer damage and fire, possibly resulting in serious injury.

Memory Stick Duo is not compatible with the Bridge media slot. Do not insert Memory Stick Duo into the slot or you may not be able to remove it. Data may be lost or damaged if you use any memory media other than those supported.
