## Bookmarks

Available languages

The bottom rack is designed for plates, pans, casseroles, and utensils. Many items, up to 13" (33 cm) tall, fit in the bottom rack.

(See recommended loading patterns shown.)

**NOTE: The features on your dishwasher rack may vary from the drawings shown.**

*10 place setting*

*12 place setting*

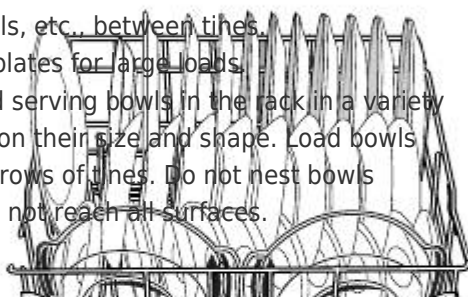

Do not load glasses, cups, or plastic items in the bottom rack. Load small items in the bottom rack only if they are secured in place.

Load plates, soup bowls, etc., between tines.

Overlap the edges of plates for large loads.

Load soup, cereal, and serving bowls in the rack in a variety of ways depending upon their size and shape. Load bowls securely between the rows of tines. Do not nest bowls because the spray will not reach all surfaces.

*Utensil load*

## Loading Bottom Rack

Load cookie sheets, cake pans, and other large items at the sides and back. Loading such items in front can keep the water spray from reaching the detergent dispenser.

Secure heavily soiled cookware face down in the rack.

Make sure pot handles and other items do not stop rotation of the spray arm(s). The spray arm(s) must move freely.

Do not load items between the bottom rack and the side of the dishwasher tub because they might block the water inlet opening.

### Fold-down tines (on some models)

You can fold down one row of tines at the back of the bottom rack.

1. Grasp the tip of the tine that is in the tine holder.
2. Gently pull the tine out of the tine holder.
3. Lay the row of tines down in the rack to make room for large dishes, bowls, pots, pans or roasters.

*Mixed load*
