Power management

Your computer ships with the power management options preset to a configuration that will provide the most stable operating environment and optimum system performance for both AC power and battery modes.

Charging the battery

NOTE

The battery needs to be charged before you can use it to power the computer.

To charge the battery, plug the computer into a live wall outlet. It takes several hours to charge the battery with the computer off. It takes much longer to charge the battery while

the computer is on.

The battery may not start charging immediately if:

CAUTION

The battery is extremely hot or cold.

Changes to these settings may result in system performance or stability issues. Users who are not completely familiar with the power management component of the system should use the preset configuration. For assistance with setup changes, contact Toshiba's Global Support Centre.

Battery charge time may vary depending on the applications, power management settings, and features used.

TECHNICAL NOTE: The battery does not charge while the computer is consuming full power.
