If the problem occurs when both the keypad overlays are off, make sure the software you are using is not remapping the keyboard. Refer to the software's documentation and check that the program does not assign different meanings to any of the keys.

## **You have connected an external keyboard and the operating system displays one or more keyboard error messages.**

If you have a second keyboard, try it. If it works, the first keyboard may be defective or incompatible with your computer.

### **Display problems**

Here are some typical display problems and their solutions:

#### **The display is blank.**

Display Auto Off may have gone into effect. Press any key to activate the screen.

You may have activated the instant password feature by pressing password, press the

If no password is registered, press and allows you to continue working.

If you are using the built-in screen, make sure the display priority is not set for an external monitor. To do this, press

and

F5

problem, press  
display priority to its previous setting.  
If you are using an external monitor:

---

Check that the monitor is turned on.

Check that the monitor's power cable is firmly plugged into a working power outlet.

Check that the cable connecting the external monitor to the computer is firmly attached.

and

simultaneously. If you have registered a
