DVD-ROM or multifunction drive problems

You cannot access a disc in the drive.

Make sure the drive tray has closed properly. Press gently

until it clicks into place.

Open the drive tray and remove the disc. Make sure the drive

tray is clean. Any dirt or foreign object can interfere with

the

laser beam.

Examine the disc to see whether it is dirty. If necessary, wipe

it with a clean cloth dipped in water or a neutral cleaner.

Replace the disc in the tray. Make sure it is lying flat, label side uppermost. Press the disc down until it locks on the spindle. Close the drive tray carefully, making sure it has shut

completely.

You press the disc eject button, but the drive tray does not slide out.

Make sure the computer is connected to a power source and

turned on. The modular bay drive eject mechanism requires power to operate.

To remove a disc without turning on the computer, use a narrow object, such as a straightened paper clip, to press the manual eject button. This button is in the small hole next to

the disc eject button on the right side of the computer.

Pull the tray fully open, remove the disc and place it in its

Some discs run correctly, but others do not.

If the problem is with an application CD-ROM, refer to the

software's documentation and check that the hardware configuration meets the program's needs.

Never use a pencil to press the manual eject button. Pencil lead can break off inside the computer and damage it.

If Something Goes Wrong

Resolving a hardware conflict
