Setting up your computer

Your computer contains a rechargeable high-capacity battery

that needs to be charged before you can use it.

To use external power or to charge the battery, you must attach the AC adapter. See

more information.

Setting up your software

The first time you turn on your computer, the Setup Wizard guides you through steps to set up your software.

1

From the welcome screen, click Next to enter the Setup Wizard.

2

Confirm acceptance of Microsoft's End User License Agreement and click Next.

3

Enter the computer name and description and click Next or Skip.

The computer will pause for a moment while checking for an internet connection, and you will see the screen "Checking your internet connectivity."

A window will display the message: "How will this computer connect to the internet?" The system displays three selections: Telephone modem, Digital subscriber line (DSL) or cable, or Local Area Network (LAN).

TECHNICAL NOTE: You must complete all set up steps up to ["Setting up your software" on page 51](#)

or internal components to your computer. These components include, but are not limited to, a mouse, keyboard, printer, memory, and PC cards.
