3

Gently pull the memory module diagonally to pull it out of the slot.

4

Complete the procedure by following steps 10 through 12 in

Connecting a mouse

You may want to use a mouse instead of the TouchPad, the computer's built-in pointing device.

To connect a USB mouse, plug the mouse cable into one of the USB ports.

Connecting a printer

Installing additional memory (optional)

["Installing additional memory \(optional\)" on page](#)

Read the documentation that came with your printer. Follow the manufacturer's instructions when connecting a local printer.

You must supply the proper printer cable. If one did not come with your printer, you may purchase one from an electronics or computer store.

If your printer is ECP- or IEEE-compliant, make sure your printer cable is an IEEE 1284 cable.

Your printer documentation may require you to install the printer software before physically connecting the printer to your computer. If you do not install the software as instructed by the printer manufacturer, the printer may not function correctly.
