Getting Started

Using the TouchPad™

NOTE

Once you have positioned your cursor, you can perform clicking functions by either double-tapping the TouchPad or

clicking the control buttons.

Scrolling with the TouchPad

There are two active regions on the TouchPad that allow you

to scroll as you would with any wheel device on a mouse or trackball.

To scroll vertically, run your finger up or down along the right

edge of the TouchPad. To scroll horizontally, run your finger

along the bottom edge of the TouchPad.

Using the Scroll button

For applicable systems, the scroll button, located between the

primary and secondary control buttons on the TouchPad, is

used for rapid viewing of pages on the screen.

Using the Control buttons

When a step instructs you to click or choose an item, move the cursor to the item, then press and release the primary (left-hand) button. To double-click, press the primary button

twice in rapid succession. The primary button usually corresponds to the left mouse button.

The function of the secondary (right-hand) button depends on the program you are using. It usually corresponds to the right mouse button. Check your program's documentation to find whether it uses the right mouse button. Because the TouchPad is much smaller than the display screen, moving your cursor across the screen often means having to move your finger several times across the TouchPad in the preferred direction.
