Selecting video cables

To connect a device to the S-video port, you will need to purchase a cable. For the best video quality, always use a properly shielded cable.

HINT: Toshiba recommends using a cable no longer than 20 feet (approximately 6 meters).

Using a poor quality cable may result in a dull or fuzzy picture, poor color, ghosting, video noise, or loss of

video.

Connecting to the S-video port

Video cables are not included with your computer. To connect

NOTE

a device to the video-out port, you will need to purchase an S-video cable.

To connect the device:

1

Connect one end of the video cable to the external video device.

Refer to the documentation provided with the device for the location of its video-in port.

2

Connect the other end of the video cable to the S-video port on the back of the computer.

3

Turn on the external video device.

4

Set the display mode by pressing Display Properties settings. For more information, see ["Directing the display output when you turn on the computer" on page 70.](#)
