Caring for your computer

This section gives tips on cleaning and moving your computer. For information about taking care of your computer's battery, see

[power" on page](#)

Cleaning the computer

To keep your computer clean, gently wipe the display

panel

and exterior case with a lightly dampened cloth. Ask your Toshiba dealer for suggestions for appropriate cleaning products.

Moving the computer

Before moving your computer, even across the room, make

sure all disk activity has ended (the drive indicator light stops

glowing) and all external peripheral cables are disconnected.

Although your notebook computer is built to withstand reasonable shock and vibration, transport it in a carrying case

CAUTION

for long trips. You can purchase a carrying case from your

Toshiba dealer, through the accessories information packaged

with your system, or visit
108.

Keep liquids, including cleaning fluid, out of the computer's keyboard, speaker, and other openings. Never spray cleaner directly onto the computer. Never use harsh or caustic chemical products to clean the computer.

Do not pick up the computer by its display panel or by the back (where the ports are located).
