Getting Started

Caring for your computer

Using a computer lock

For your own peace of mind, you may want to secure your

computer to a heavy object such as your desk. The easiest way to do this is to purchase an optional PORT-Noteworthy Computer Lock Cable.

Sample PORT-Noteworthy

To secure the computer:

1

Loop the cable through or around some part of a heavy object. Make sure there is no way for a potential thief to slip the cable off the object.

2

Pass the locking end through the loop.

3

Insert the cable's locking end into the security lock slot on the computer, then give the key a quarter turn and remove it.

The computer is now securely locked.
