Getting Started

Connecting a printer

Connecting a printer

NOTE

You can connect a USB-compatible printer to your computer through the USB ports. To determine if the printer is USB-

compatible, check its documentation.

To make the connection, you need a suitable USB cable which may come with your printer. If a USB cable was not included with your

printer, you can purchase one from a computer or electronics store.

If your printer supports Plug and Play, your computer may automatically recognize the printer; the printer is then ready for use.

Refer to your printer documentation for further instructions.

If your printer does not support Plug and Play, you can set up the printer as described in

To connect a printer to your computer:

1

Connect the printer cable to the printer and then connect the other end to one of the computer's USB ports.

2

Plug the printer's power cable into a live AC outlet.

Setting up a printer

NOTE

If your printer does not support Plug and Play, follow these steps to set it up for the first time. You only need to set up the printer once.

1

Click Start, Control Panel, and then Printers.

The Printers window appears.

Your printer documentation may require you to install the printer software before physically connecting the printer to your computer. If

you do not install the software as instructed by the printer manufacturer, the printer may not function correctly.

Read the documentation that came with your printer. Follow the manufacturer's instructions when connecting a printer.
