Starting a program

2

Click the program group, in this example, Accessories. The Accessories menu is displayed.

3

Click the program, in this example, WordPad.

WordPad opens.

To close the program, click the Close button in the upper-right corner of the program's window.

Starting a program from Windows

If a program is not listed in the All Programs menu, you can start it from Windows

your computer's contents as a hierarchy or "tree." You can easily see the contents of each drive and folder on your computer. To use this method, you should know the file name and location of the program's executable file (this file ends with .exe).

This example opens WordPad using Windows

1

Click Start, and then All Programs.

NOTE

2

Click Accessories.

3

Click Windows Explorer.

4

In the left part of the window, double-click Computer to expand the window.

5

In the left part of the window, click the line that ends in "Local Disk (C:)."

6

In the left part of the window, under the Local Disk C: icon, double-click the folder containing the program, in this case

Program Files.

Windows

folder on the right side of the window. The left side of the window shows all the folders contained within the Program Files folder.

7

In the left part of the window, double-click Windows NT.

8

In the left part of the window, double-click Accessories.

Windows

folder on the right side of the window.

R

_

Explorer. Windows

If you pause with your mouse on All Programs, it will open it up. You may need to scroll up or down to see the complete list.

R

Explorer shows the contents of the Program Files ®

Explorer shows the contents of the Accessories
