Mobile Computing

Running the computer on battery power

Battery Notice

Battery life may vary considerably from specifications depending on product model, configuration,

applications,
power management settings and features utilized, as
well as
the natural performance variations produced by the
design of
individual components. Published battery life numbers
are
achieved on select models and configurations tested by
Toshiba at the time of publication. See "Detailed Specs"
for
specific battery measurement test. Recharge time varies
depending on usage. Battery may not charge while the
computer is consuming full power.

After a period of time, the battery will lose its ability to
perform at maximum capacity and will need to be
replaced.

This is normal for all batteries. To purchase a new
battery

pack, see the accessories information that shipped with
your

computer or visit the Toshiba web site at
accessories.toshiba.com.

To ensure that the battery maintains its maximum
capacity,

operate the computer on battery power at least once a
month

until the battery is fully discharged. Please see ["battery life" on page 117](#)

continuously operated on AC power, either through an AC

adaptor or a docking station (if applicable to your system),

for an extended period (more than a month), the battery may

fail to retain a charge. This may shorten the life of the battery,

and the battery light may not indicate a low-battery condition.

NOTE

The computer also has an internal real-time-clock (RTC)

battery.

For optimum DVD performance, it is recommended that you play DVDs while running the computer on AC power.

for procedures. If the computer is
