Inserting a charged battery

To insert a battery:

1

Wipe the terminals of the charged battery with a clean cloth to ensure a good connection.

2

▲ WARNING

Insert the charged battery into the slot until the latch

clicks.

The battery pack has been designed so that you cannot install it with reverse polarity.

If the battery is leaking or its case is cracked, put on protective gloves to handle it, and discard it immediately. Always dispose of used battery packs in compliance with all applicable laws and regulations. Put an **AWARNING** insulating tape, such as cellophane tape, on the electrode during transportation to avoid a possible short circuit, fire or electric shock. Failure to do so could possibly result in serious injury.

If the battery does not slide into the slot easily, move the battery release lock to the unlocked position and try again. Do not force the battery into position.
