**3**

Slide the battery release lock to the locked position.

*(Sample Illustration) Locking the battery release lock*

**4**

Turn the computer right side up.

**5**

Reconnect any cables that were removed in step 3 of  
"Removing the battery from the computer" on page

**6**

Restart the computer.

## Taking care of your battery

The following sections offer tips on how to take care of your battery and prolong its life.

### Safety precautions

If the battery pack produces an odor, overheats or changes color or shape while it is being used or charged, turn off the computer's power immediately and disconnect the power cord/cable from the power socket. Carefully remove the battery pack from the computer.

Do not try to disassemble a battery pack.

Do not overcharge or reverse charge a battery. Overcharging will shorten its life, and reverse charging could damage it.

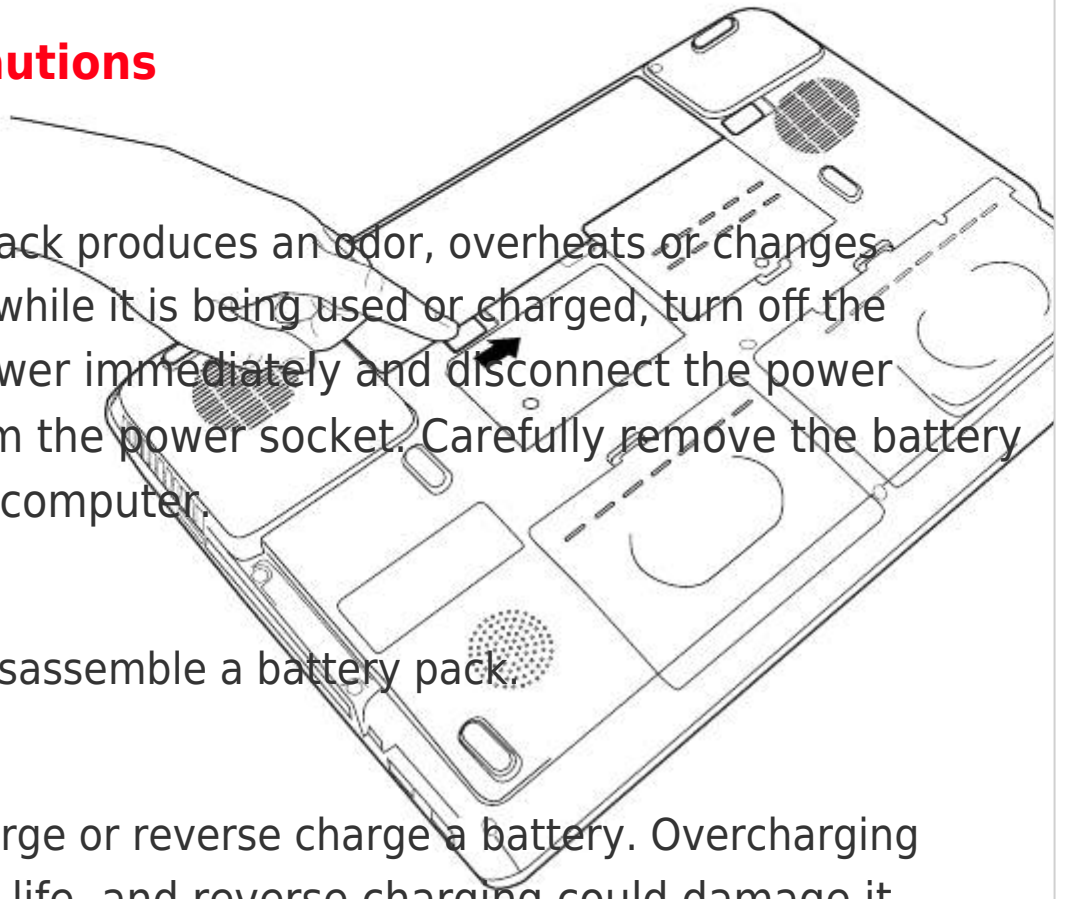

Avoid touching the metal terminals of the battery with another metal object. Short-circuiting the battery can cause it to overheat and may cause damage to the battery or the computer.

Do not incinerate a spent battery, as this could cause it to explode and release caustic liquid.
