Exploring Your Computer's Features

Web Cam

Using external speakers or headphones

Your computer is equipped with a full stereo sound system with internal speakers. Instead of using the internal speakers, you can connect headphones or a pair of external stereo speakers.

▲ CAUTION

To play back sound files through external speakers or headphones:

1

Locate the headphone jack on the computer.

2

Using any necessary adapters, plug the cable from the headphones or external speakers into the headphone jack.

The headphone jack requires a 16-ohm stereo mini-jack.

To adjust the volume:

CAUTION

For external speakers, use the volume controls on each speaker.

For headphones, use the computer's volume control.

Web Cam

(Available on certain models)

Your computer may come with a built-in web cam. With this web cam you can do the following:

Take pictures and record videos with your notebook computer

Chat with others and have them see you while using instant messaging (IM) programs

Have video conference calls

NOTE

Before putting on headphones to listen, turn the volume down. Do not set the volume too high when using headphones. Continuous exposure to loud sound can harm your hearing.

TECHNICAL NOTE: When using amplified speakers, use speakers

that require an external power source. Other types of speakers will be inadequate to produce sound from the computer.

To E-mail, instant message or video conference, you must be connected to the Internet.

Depending on your computer model, the process of sending E-mail, taking pictures or recording video messages may vary.
