While continuing to press
desired Power Plan.

The Power Plan options are: Balanced, Power Saver, and High
Performance.

3

Release the

The hot key card disappears. You are now in the selected mode.

Changing the main battery

When your main battery has run out of power, you have two options: plug in the AC adaptor or install a charged main battery.

Removing the battery from the computer

To remove the battery:

1

Save your work.

2

Turn off the computer or place it in Hibernation mode according to the instructions in

["Hibernation mode" on page](#)

3

Unplug and remove any cables connected to the computer, including the AC adaptor.

4

Close the display panel and turn the computer upside down. key.

Fn

Never short circuit the battery pack by either accidentally or intentionally bringing the battery terminals in contact with another conductive object. This could cause serious injury or fire, and could also damage the battery pack and computer.

Never expose a battery pack to abnormal shock, vibration or pressure. The battery pack's internal protective device could fail, causing it to overheat or ignite, resulting in caustic liquid leakage, or explosion or fire, possibly resulting in death or serious injury.

TECHNICAL NOTE: To avoid losing any data, save your files and then either completely shut down your computer or put it into Hibernation mode before changing the main battery.

Mobile Computing
