Exploring Your Computer's Features

Setting up for communications

Accessing a network

To access a network:

At the office,  connect an Ethernet cable to the RJ45 jack on your computer. For specific information about connecting to the network, consult your network administrator. Many hotels,

airports, and offices offer Wi-Fi
Wi-Fi
network.

While you are at home or traveling, you need a dial-up connection. Ask your network administrator for the telephone number of the network.

Setting up the connection

To set up an office connection, consult your network administrator for network settings and additional considerations.

To set up a dial-up connection, use the Connect to the Internet Wizard:

1

Click Start, Control Panel, Network and Internet, and then **Connect to the Internet.**

2

Click Dial Up.

3

Enter the phone number and account information of your Internet connection.

4

Click Connect and let the program dial the number.
The computer connects to the Internet.

Connecting a modem to a telephone line

(Available on certain models)

Your computer may come with a built-in modem that can be connected to a standard voice-grade telephone line.

The modem allows you to:

Access the Internet

Communicate with your office's local area network (LAN) or larger corporate wide area network (WAN)

For specific information about connecting to a LAN or WAN, consult your network administrator.

Send a fax directly from your computer

For more detailed information regarding your computer's modem, 

visit Toshiba's Web site at accessories.toshiba.com.

®

, ask them for help when connecting to their Wi-Fi

®

access. If your computer has
