Exploring Your Computer's Features

Exploring audio features

Exploring audio features

You can use your computer to record sounds using the computer's internal microphone (available on certain models) or an optional external microphone. You can listen to sound files or audio CDs using the built-in speakers, headphones, or external speakers.

Recording sounds

You may record sounds using the computer's internal microphone (available on certain models) or by connecting an optional external microphone.

Using a microphone

1

If you want to use an external microphone, connect it to the computer.

2

Click Start, All Programs, Accessories, and then Sound Recorder.

(Sample Image) Sound Recorder screen

3

Click the Start Recording button.

4

Speak normally into the microphone.

5

When you have finished recording, click the Stop Recording button.

The Save As dialog box appears.

6

To save the file, type a file name, and then click Save.

Using external speakers or headphones

Your computer is equipped with a full stereo sound system with internal speakers. Instead of using the internal speakers, you can connect headphones or a pair of external stereo speakers.

Start Recording/Stop Recording button

Before putting on headphones to listen, turn the volume down. Do not set the volume too high when using headphones. Continuous exposure to loud sound can harm your hearing.
