TOSHIBA PC Health Monitor

TOSHIBA PC Health Monitor

The TOSHIBA PC Health Monitor software program monitors computer system functions such as power consumption, the cooling

system and the 3D Accelerometer (available on certain models). It alerts users to specific system conditions via pop-up messages. It also tracks the usage of the computer and related devices and logs service-relevant information on the computer's internal storage drive.

The collected information includes device operation time and number of actuations or status changes (e.g.: number of power button and

Fn

key combination uses, and AC adaptor, battery, LCD, fan, HDD, sound volume, wireless communication switch, docking

and USB information), date of initial system use, and also computer and device usage (e.g.: power settings, battery temperature and recharging, CPU, memory, backlight illumination time, and temperatures for various devices). The collected information is not

limited to the examples specified here. The stored data uses a very small portion of the total hard disk capacity (approximately 3 MB or less per year).

This information is used to identify and provide a notification of system conditions that may affect the performance of your

Toshiba

computer. It may also be used to help diagnose problems should the

computer require service by Toshiba or Toshiba's authorized service

providers. Additionally, Toshiba may use this information for quality assurance analysis.

Subject to the use restrictions above, the data logged on the

internal

storage drive may be transferred to entities located outside of your country or region of residence (e.g., European Union). Those countries may or may not have the same data protection laws or data protection levels as required by your home country or region.

Once enabled, you may disable the TOSHIBA PC Health Monitor at any time by uninstalling the software via Add/Remove Programs

®

in the Windows

Control Panel. Doing so will automatically delete all collected information from the internal storage drive.

The TOSHIBA PC Health Monitor software does not extend or modify Toshiba's obligations under its standard limited warranty in

any way. Toshiba's standard limited warranty terms and limitations apply.
