To create recovery DVDs:

**1**

Click **Start, All Programs, Toshiba, Recovery, and then Recovery Disc Creator.**

**2**

Select DVD (to create Recovery media on DVD).

**3**

Select the items you want to copy to DVD by clicking the check box next to each item's Name—recovery files,

applications (original bundled drivers and applications), or both the recovery files and applications.

**4**

Click Create.

**5**

Insert a blank DVD into your optical disc drive when prompted.

## NOTE

**6**

Follow the on-screen prompts to complete the copy process. For information on using the recovery media you have created with the preceding steps, see

[page](#)

71.

## Restoring from recovery media

## NOTE

If you have created recovery DVDs for your system, you can recover your system even if the recovery files have been deleted from your internal storage drive or if you have replaced your internal storage drive. For instructions on creating recovery media, see

["Creating recovery media" on page](#)

*Recovering the Internal Storage Drive*

As you create your recovery DVD set, be sure to label each DVD sequentially (for example, "1 of 3", "2 of 3", etc.), so that you will know in which order to insert the discs during recovery.

The recovery process deletes information stored on the internal storage drive. **CAUTION** Be sure to save your work to external media before executing the recovery.

During the internal storage drive recovery process it is strongly recommended that your computer be connected to an external power source via the AC adaptor.

"Restoring from recovery media" on  
70.
