Exploring Your Computer's Features

Web Camera

Web Camera

(Available on certain models)

Your computer may come with a built-in Web Camera. With this Web Camera you can do the following:

Take pictures and record videos with your computer

Chat with others and have them see you while using instant messaging (IM) programs

Have video conference calls

NOTE

Depending on your computer model, the process of sending E-mail, taking pictures or recording video messages may vary.

The Web Camera software, by default, should already be running in the Notification Area.

Using PC Cards

Your computer comes with a PC Card slot and supports two types of PC Cards that you can install:

Type I cards

Type II cards

The PC Card slot supports hot swapping, which allows you to replace one PC Card with another while the computer is on.

To E-mail, instant message or video conference, you must be connected to the Internet.

TECHNICAL NOTE: For PCMCIA-compatible PC Cards, check the package to make sure they conform to the PCMCIA 2.1 standard (or later). Other cards may work with your computer, but are likely to be much more difficult to set up and use.
