Exploring Your Computer's Features

Using the i.LINK

3

Grasp the card and pull it straight out.

(Sample Illustration) Removing memory media

Using the i.LINK

The i.LINK

extremely fast data transfer rate.

In addition to high speed, the i.LINK isochronous data transfer (the delivery of data at a guaranteed rate).

This makes it ideal for devices that transfer high levels of data in real-time, such as video devices.

As with USB ports, the i.LINK (automatic configuration) and hot swapping (the ability to connect and disconnect devices while the computer is on).

Using the eSATA/USB combo port

Your computer includes an eSATA/USB combo port, which can be used with both eSATA (external Serial Advanced Technology Attachment) devices and USB devices. The eSATA interface supports fast data transfer rates, which is especially useful for transferring and storing large files such as digital photo, music or

CAUTION

video files. Like the USB and i.LINK interfaces, the eSATA interface supports hot swapping (connecting and disconnecting devices while the computer is on). eSATA devices require an external power source.

® **ManualsLib.com**
port

Do not remove memory media while data is being written or read. Even when the Windows to the media might still be in progress and your data could be destroyed. Wait for the indicator light to go out.

® **port**

®

port on the side of the computer provides an

®

message "copying..." disappears, writing

®

port also supports

®

port supports both ~~Plug-and-Play~~
